

# Product Technical Data Sheet

## Copper grease

Copper grease - a multi-use preparation used in the most difficult conditions and over a wide temperature range from -40°C to 1100°C. Provides excellent lubrication, protection from friction wear, corrosion, and high temperatures.

### Application:

- lubrication of bolts and nuts, threaded connections, all fitting surfaces, pipe fittings, spark plugs, screws, wheels, washers, discs, battery terminals, port devices, turntables, heavy duty bearings of all types and other components of industrial vehicle systems, construction and agricultural machinery, and motor vehicles.

### Physicochemical properties:

Parameters	UoM	Result
Colour	-	copper
Specific weight	g/cm <sup>3</sup>	969
Solubility in water	%	< 1,0

### Packagings:

Volume	Type of packaging	Collective packaging	Item Code
100 ml	aerosol	4 / 20	ART.AGT-151
400 ml	aerosol	4 / 24	ART.AGT-176

### Warehousing:

Store in a well-ventilated, cool place. Keep away from children. Protect from sunlight and do not expose to temperatures exceeding 50°C. Professional application: keep in original, properly labelled, airtight containers in a cool, dry, well ventilated storage room (in a fireproofed building).

Data contained in this document are consistent with the current state of our knowledge. They describe typical product properties and applications. However, it is up to the user to examine the suitability of this product for specific applications. We deny liability for the obtained results on the grounds that application conditions lie beyond our control.
