

Comparison Chart of Reflector

	Before	After
<p>Outward Appearance</p>		
<p>Structure Diversity</p>	<p>Before: the bottom of the item is completely flat to the surface of PCB.</p>	<p>After: the bottom of the product is a structure with support legs.when assembling,there is a 1mm gap between the bottom and PCB,which is more conducive to the heat dissipation of the DISPLAY LED while in use.</p>
