

480LEDs/m COB single color led strip DC24V

◆ Product Description:

This is a COB LED strip light, compared to the SMD 2835: 1 chip on board, or 5050: 3 chips on board, a COB(Chip On Board) LED light has multiple chips on the same PCB, which makes the emitting units unprecedentedly close to each other, and create super even lighting performance. The Highlights of COB: Lower power, higher light efficiency (110LM/W), higher CRI(90+), 180 degrees beam angle, multiple chips on board for uniform illumination, NO dark spot!
