

# NDA.Q

End-caps for square tubes with adjustable height levelling element

NDA.Q-20 + NDA.Q-25

NDA.Q-30 + NDA.Q-50

## technical informations

### Material

Polyamide (PA) based tecnopolymer.  
Resistant to solvents, oils, greases and other chemical agents.

### Colour

Black, matte finish.

### Features and applications

End-caps for square tubes with adjustable height levelling element. The assembly can be performed simply by positioning the end-cap, forcing it, inside the tube, with no need of screws or other fasteners.

Standard Elements		Main dimensions							Tube dimensions			Max limit static load*	Weight

\* The value refers to laboratory tests carried out with a load applied vertically to the leveling element unscrewed from the end-cap of 10 mm and leaning on a flat surface.  
 The max limit static load is the value above which the load applied to the element may cause some plastic material breakage, under particular conditions of use. Obviously, a factor that takes into consideration the importance and the safety level of the specific application must be applied to this value.
