Discover new possibilities

Electronic devices, especially PCs and laptops, have revolutionized our lives. We use them every day at work and home. You watch movies, family photos, listen to music with friends, or prepare a presentation for school or work. We store many files on CD / DVD media, but modern computers are not always equipped with a drive that allows you to read or record files, so the Qoltec brand recorder will be the perfect solution, thanks to which you can install a disk drive for reading or recording files.

Choose quality and safety

The housing of the Qoltec DVD-RW recorder is made of reliable and durable plastic. It is durable, light, and perfectly protects the drive against damage. Minimalistic and elegant design, which gives a thin casing provides excellent aesthetics and comfort of use, and the well-thought-out design has a suitable place to store the USB cable. The practical solution eliminates the loss of the cable, and at the same time makes it easier to store and carry the device. Cushioning is provided by additional rubber feet that stabilize the housing against movement.

Innovative technology in your home

You don't need to install drivers, just plug into a USB port, and use thanks to the simplicity of the Plug & Play function. The drive is compatible with all major operating systems, including Windows 10, Windows 8.1, Windows 8, Windows 7, Vista, XP, Linux, and MAC OS. The Qoltec DVD-RW burner is built based on high-class, alternative components that will automatically detect the type of interface and adapt to it.
