## Derating

## Typical Application Circuit

Model	C2	TVS
12Vout	120µF/25V	SMBJ20A
24Vout	68µF/35V	SMBJ30A
28Vout	68µF/50V	SMBJ36A

### Note:

We recommend using an electrolytic capacitor with high frequency and low ESR rating for C2 (refer to manufacture's datasheet). Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1 is a ceramic capacitor, used to filter high-frequency noise.

TVS is a recommended suppressor diode to protect the application in case of a converter failure.
