Hands-free kit function (built-in microphone):	Yes
Bass boost function:	Yes

TR-14 car transmitter is a multifunctional device equipped with Bluetooth 5.0 and advanced ENC technology (Environmental Noise Cancellation) which reduces noise by suppressing unnecessary sounds from the environment, which improves the quality of conversations. Implemented music processor allows to play favourite music in great quality. Transmitter has a Micro SD multimedia input and AUX line output. It is also equipped with two fast charging outputs that support Quick Charge 3.0 and Power Delivery 3.0, therefore you can quickly charge your smartphone or tablet.
