

MeiG Smart SLM750 Module

LTE Cat.1 Module With MiniPCle Packaging

MeiG Smart SLM750 series of M2M modules are designed to provide customers with wireless communication service. It covers three operators' network in domestic and the main operators's network of the world. It delivers maximum 10Mbps-DL and 5Mbps-UL data rates on LTE networks, and has backward compatibility with 3G and 2G networks to ensure that network communication is working in remote areas.

Rx diversity and MIMO technology is provided to improve communication quality and optimize data transmission rate; high-sensitivity GNSS function is also provided.

A rich set of protocols (TCP/FTP/HTTP) and multiple OS compatibility extend the applicability of the module to a wide range of M2M applications.
